The AquaPhoenix Culture

AquaPhoenix Scientific has worked hard to establish a corporate culture in which each employee is committed to safety, quality control and customer service. With these priorities driving our business, we are confident we will remain an industry leader, dedicated to building long-term relationships with our customers. To maintain our high standards of service and customer support, continuous improvement is at the core of AquaPhoenix. Through Lean Manufacturing initiatives, we are always looking for ways to reduce waste and improve efficiency. Every aspect of the company is continuously reviewed – from test kit manufacturing, to customer service, to technical support and development. We feel this constant evolution is vital to our success and we will always work hard to provide the best customer experience.

The Lighter Side of AquaPhoenix

Having a balanced work environment is an important part of our culture. Each year the company sponsors events where employees are able to enjoy time together both in and out of the workplace. Summer picnics, Halloween and ugly sweater parties, and our formal Christmas dinner are events we look forward to each year.

Our team is also committed to giving back to our community. We sponsor after school programs in support of science education and regularly donate educational supplies to local school districts. Every July our company rallies in support of the American Cancer Society through the Relay for Life. Employees work hard to fundraise money for this event and every donation is matched, dollar for dollar, by the company.
