

## Warehousing & Fulfillment

Many customers look to us to provide fulfillment services. With our modern, 209,000 ft<sup>2</sup> climate-controlled facility, we have the capacity and expertise to excel in this role. We are passionate about our inventory control process and quick order turnaround times. We continually drive to improve both efficiency and reliability, resulting in accurate, timely delivery.

All hazardous materials are handled by our highly trained in-house staff and shipped according to HM-126F, Dangerous Goods Regulations. We work closely with UPS, Fed Ex, the US Postal Service and several nationwide trucking services to drop ship products to over 60 countries.

### Online Ordering & Support

With EDI capabilities or a private-labeled eCommerce website, your next shipment is just a click away. Put a link on your website or assign individual accounts to each of your end users to maintain accountability while keeping products easily accessible. We provide online access to SDS documents for all of the chemicals we manufacture. This offers your customers access to the most current Safe Handling/Disposal/First Aid information 24/7.

**We offer customer specific stocking programs!**
