# I Wound Care Basic Kit

The Wound Care Kit to practice wound dressing protocols and bandaging techniques! Identify, assess, and clean sores in various stages of decubitus. See the potential effects of diabetes mellitus on feet from pressure points to skin loss and tissue necrosis. Practice dressing, bandaging, and drain care on a life-size simulator after surgical procedures such as mastectomies, appendectomies, amputations, and more. Great for any wound care class!

### Wound Care & Bandaging Trainer

Using this high quality simulator, students learn how to care correctly for their patients' wounds and can practice a wide range of dressing and bandaging techniques. The life-like skin reacts realistically to adhesives and bandages, so students can practice in conditions as close to reality as possible. Given the flexible structure of the material, students can practice putting on and changing bandages and dressings in realistic conditions.

### 3B Scientific® Decubitus Simulator

With this realistic and affordable wound care trainer, nursing and medical students will be able to:

- Visualize and understand the differences in decubitus wounds
- Practice wound cleansing
- Practice bandaging techniques with multiples dressings methods
- Improve the classification, staging, and their wound assessment skills
- Measure wound length, depth, undermining, and tunnelling. The realistic texture and flexibility of the skin offer a realistic haptic and optic, and therefore promote effective training. Each wound has been colored exactly as seen on a real patient.

### 3B Scientific® Diabetes Foot Treatment Trainer

The after-effects of a diabetes mellitus can result in defects and pressure points in the foot area. This is recognisable by black coloration in the wound area.
