

EISCO™ PRACTICE SUTURE KIT

www.fisheredu.com/eisco

Physician designed, life-like plastic suture pad and tools for training and practice

The Eisco™ Practice Suture Kit includes everything needed to demonstrate and practice suturing skills. The kit features a variety of simulated cuts and has been designed for use by medical, nursing and veterinary students as well as surgical, emergency and anesthesia residents. Our innovative plastic suture pad is durable and does not tear, allowing each cut to be sutured multiple times. The kit is compact and can be used in the classroom, laboratory or at home.

Each Eisco™ Practice Suture Kit includes:

- Suture pad with simulated wounds (6.5 x 5.75 x 0.5 in)
- 5" Needle holder
- Toothed forceps for handling tissue
- Fine suturing scissors
- 5 Sutures with needles
- 2 Tubing pieces

The Eisco™ suture pad has been designed to simulate a variety of common cuts & lacerations

- Long & short straight cuts for practicing interrupted or running stitches
- Wide cuts to practice mattress stitches
- Curved cuts of various sizes
- Y shaped cut for practicing a corner stitch
- Cut with irregular width to approximate a wound that has been cleaned of debris and dead skin (**Eisco kit exclusive!**)
- Slits and tubing to practice securing chest tubes, catheters, drains and central lines (**Eisco kit exclusive!**)

This kit and all components are manufactured and sold for educational purposes only. They should never be used on a living specimen of any kind.
