

# Black Diamond™ Knives

## Disposable Pathology Knives

- Well proven
- Cost effective
- Finger guard for added safety
- Range of sizes to suit all applications

**Black Diamond™** disposable cut-up knives have been well proven in use over many years as a safe and cost effective alternative to re-sharpening autopsy knives. Complete disposal of knife and handle eliminates problems of replacement blade fit and worries of contamination when working with diseased tissue.

*All knives are supplied in packs of 10 or an assorted pack containing 2 knives of each size. The box in which the knives are packed may be used for archiving tissue specimens.*

**Black Diamond™** knives come in 5 sizes, all of which have high quality Sheffield Stainless Steel double honed blades and molded handle with finger guard for added safety.

The five blade lengths enable the Pathologist to select the optimum size of knife for any purpose.
