

CliniSYNC Solutions:

Streamline your supply chain across all facilities by connecting your clinics with central supply

Address challenges with offsite supply management with help from Fisher HealthCare, including:

- Process and purchasing efficiencies
- Product and pricing harmonization
- Compliance and spend visibility
- Access to favorable contract pricing
- High-value product formulary suggestions to improve clinic testing

Profile of a health system that implemented the CliniSYNC solution:

- 1200 beds
- 3 facilities
- Approximately 60 clinics

Here's what a large university health system had to say after they implemented the program:

"Our teams appreciate the simplicity of ordering. I appreciate the data management and business reviews that Fisher HealthCare does for us. No other vendor comes to me with business reviews. We asked [another company] last year and they sent a print out of our orders. No strategic meetings or planning sessions. One Thermo Fisher Scientific for research and healthcare – and now our clinics, it just makes sense."

- Chief Executive Officer

"We enjoy using Fisher HealthCare in the hospital. Being able to order for the clinics with Fisher HealthCare enables us to save time and money. The individual account numbers with specific ship to locations all tied to our central pricing makes my job easier."

- Director of Materials Management
