

As a leading designer and manufacturer of high-value disposable Personal Protective Apparel and Infection Control Products suitable for Controlled Environments, AlphaProTech is dedicated to producing the highest quality products possible to maintain its leadership position in product development and design.

Garments worn in Controlled Environments reduces product contamination, protects workers and environments, reduce slips, trips and falls, and are comfortable for long durations of wear. AlphaProTech's comprehensive selection of materials and garment designs meet a wide range of application requirements and budgets. Materials are clean, durable and offer the wearer a greater comfort level than comparative materials on the market today.

AlphaProTech's product portfolio includes products specifically designed for markets such as of pharmaceutical, bio-pharmaceutical, medical device and lab animal research.

Critical Cover® Microbreathe® Facemask

- Designed for Cleanroom Use
- High Filtration Efficiency
- Soft Knit Ear Loops
