Gas Detection Instrumentation

Whether you're maintaining gas detectors or monitors for a large industrial facility, a military installation, or a fire department, Fisher Scientific safety services has a program to fit your needs.

About

Gas detection equipment must be calibrated and serviced regularly to protect those using it and the environment. Fisher Scientific safety services technicians are trained and certified by leading manufacturers, including MSA, Dräger, and Honeywell.

In addition to repairing and calibrating gas detectors, inquire about our Thermo Scientific portable radiation instrumentation concierge service.

Key Benefits

Fisher Scientific safety services technicians are trained to thoroughly evaluate, repair, and calibrate portable gas detectors. Our regular service protocols include:

- Inspecting and calibrating to manufacturer-recommended specifications
- Checking audible and visual alarms
- Replacing sensors
- Calibrating using NIST-traceable reference gases
- Providing calibration certificates for your records
