

# Honeywell ACS Reagent Grade Solvents for General Laboratory Use

Honeywell ACS solvents for general laboratory use are a value priced solution for applications such as preparative-scale HPLC, cleaning and organic synthesis.

They are also suitable for less demanding applications such as routine isocratic HPLC. These solvents allow lab process scale-up with minimal lot-to-lot variations and decrease issues traceable to solvent contamination. All solvents are tested to meet ACS general use specifications.

## Features

Complies with the ACS reagent grade, for general laboratory use\*.

Low water

Low residue

High GC purity
