Assessment

Contamination Control PPE

The APEX Program by Kimberly-Clark Professional

The APEX™ program by Kimberly-Clark Professional™ offers a multi-step approach that includes a site assessment, training, and post-implementation support to help ensure proper contamination control with Kimtech™ PPE.

About

Change can be disruptive, especially in environments where personal safety and contamination control are essential. That's why we developed the APEX program, a consultative approach that ensures a seamless transition to the Kimtech brand of PPE.

With over 60 years of industry expertise in delivering innovative solutions for critical environments, APEX by Kimberly-Clark Professional helps protect your process while enhancing efficiency and performance.

Our four-pronged approach includes an assessment, preparation, implementation, and post-sales support. The APEX service covers everything from site surveys, application assessments, and pre-written standard operating procedures (SOP) to best practices, aseptic techniques, and training. All of this can be conducted virtually or in person at the customer location.

When it comes to managing change, you can trust Kimberly-Clark Professional and the APEX program to make it both seamless and worry-free.

Key Benefits

Change Made Easy

- **Assess** processes, equipment, and sustainability goals
- **Prepare** success criteria, forecasts, qualification documents, and SOPs
- **Implement** with training and visual management
- **Measure** results
