Confined Space Training

MSA helps you stay compliant with their extensive offering of confined space training courses designed for various applications. These courses are taught by MSA factory-trained technicians.

About

Training courses are a mix of hands-on and classroom instruction to maximize the training experience. Attendees will receive an instruction training manual and supporting documentation along with a certificate of completion once the course is completed.

The courses offered include confined space entry, competent person, rope rigging/rescue, and train-the-trainer. These training courses are designed for the industry and are not limited to only MSA products but include all applicable solutions.

Key Benefits

- Extensive course offering
- Hands-on learning
- State-of-the-art training facilities
- Experienced, certified instructors
- Drives customer compliance
