

Essential Products and Services

for Advancing **Your Production Workflow**

For more than a century, we've been building on a reputation of integrity and serving as a trusted resource for our customers. Count on the Fisher Scientific channel as your secure, reliable source for products from top brands and value-added services to support your **pharma and biotech manufacturing facility's** needs, from development through clinical phases, to full-scale production.

Lean on us for agility in your supply chain when your batches hinge on your operation's dynamic needs. We make it easy for you to source products that come with certificates and quality documentation and receive updates on lead times and shipment schedules.

Whether you work in small or large molecules, advanced therapies, APIs, biologics, oral solids, steriles, or another area, our team is here to help support your fast-paced, dynamic cGMP production facility. From raw material receipt, warehousing, quality assurance, manufacturing, packaging, and quality control to final release, we understand your need for flexible solutions that enable your operation to produce on time, getting it right the first time.

Comprehensive Portfolio of Products and Services

- Products sourced from world-class suppliers who can support global scale, providing choice and convenience
- Direct materials for manufacturing, including single-use technologies, production chemicals and buffers, and cell culture media
- Indirect materials for manufacturing, including cleanroom consumables, personal protective equipment, cleaning chemicals, supplies, and equipment
- Laboratory products, including instruments, equipment, furniture, and consumables that enable chemistry and microbiology testing of raw materials
- Facility products, including safety, industrial hygiene, and environmental monitoring items
- Capital equipment and construction products, including modular buildings, process equipment and instrumentation, furniture, cold storage, and hazardous material and biosafety cabinets
- Customized service solutions designed to deliver quality and supply assurance and improve operational productivity

Supporting Every Step from Molecule to Medicine

Key Product Categories

Chemicals & Direct Materials

- Chemicals
- Process buffers
- Water for Injection (WFI)
- Cell culture media
- Sera
- Supplements
- Cell culture systems
- Bioprocessing containers (flexible and rigid)
- Sterile glass vials

Consumables

- Fluid transfer clamps, connectors, tubing
- Single-use bottle assemblies
- Wipers
- Bags, wraps & film
- Tape
- Matting
- Swabs
- Pipets & pipette tips
- Chemicals & reagents
- Plastics & filters
- Glassware & vials
- Plates & slides
- Caps, tubes, wipes

Environments & Contamination Control

- Apparel & gowning
- Cleanroom socks
- Gloves & glove liners
- Cleaning chemicals
- Disinfectants, detergents & sanitizers
- Mops, buckets & vacuums
- Cleanroom vacuums
- Stationery & documentation
- Environmental monitoring
- Ultrasonic cleaners

Facility Equipment, Furniture & Storage

- Hoods & enclosures
- Ventilation
- Carts, racks & shelving
- Desks, chairs & benches
- Storage cabinets
- Biosafety cabinets
- Hazardous chemicals storage
- Sinks
- Modular buildings accessories
- Gowning room point of use

Instruments & Equipment

- Pumps
- Particle counters
- Data loggers & recorders
- Temperature & humidity meters
- Moisture analyzers
- Flow analyzers
- Raman spectroscopy
- Balances & calibration weights
- Microscopes
- Cold storage
- Ovens, autoclaves & freeze dryers
- Chromatography systems
- Spectroscopy systems
- Glass washers & dryers
- Lab automation
- Microbiology equipment
- Centrifuges
- Miscellaneous benchtop equipment

Safety

- Facility safety & maintenance
- Respiratory protection
- Eye & face protection; prescription eyewear
- Gloves & hand protection
- Safety shoes
- Chemical protective clothing
- Lone worker protection
- Industrial hygiene
- Showers & eyewash stations

Featured Brands

Thermo Scientific, Fisherbrand, Fisher Chemical, Gibco, Ansell, Avantor, BD, Corning, Contec, Cytiva, Decon Labs, Dupont, DWK Life Sciences, Eppendorf, Greiner Bio-One, Kimberly-Clark Professional, Micronova, METTLER TOLEDO, MilliporeSigma, Spectrum, Steris, Veltex

Helping our customers accelerate innovation and enhance productivity

Supply Assurance and Compliance Services

Count on our team of experts who understand your business needs. We're here to help ensure that your critical materials arrive on time—according to your specifications—and to help you comply with global industry regulations (FDA, Health Canada, EMEA, MHRA, EPA, OSHA, etc.).

- Customized solutions for inventory planning, inventory storage, single-lot management, quality documentation, specialized palletization, and warehousing storage, including inbound receipt verification and submission to QC
- Assessments and trainings to help you meet health, safety, and cleanroom standards using principles of Six Sigma; e.g., critical environment, occupational hazard, and industrial hygiene

On-Site Productivity Enhancement Services

As an extension of your operations team, we provide specialized, end-to-end services to help you maximize operational productivity through a network of world-class service and support personnel.

- Comprehensive inventory management support for all models, including stockroom management, grab and go, tracked, hub and spoke, consigned, customer owned, Unity™ Lab Services (ULS) managed, customer managed, etc.; plus access to metrics for tracking, managing, and optimizing inventory
- Handling and streamlining the order entry system, including requisition processing, expediting, tracking, etc.
- Laboratory services ranging from pipette calibration and buffer and media prep to sample management and glassware washing and sterilization
- ULS asset management services led by a team of certified technicians to help you ensure compliance of your lab equipment and analytical instrumentation to cGxP, 21 CFR Part 11, ISO, and other key regulations
- Access to ULS integrated solutions for driving efficiencies, increasing uptime, and decreasing inventory costs, including instrument qualification (IQ/OQ), calibration, and repair
- Vending solutions that provide versatile and scalable inventory management options for your business, including secure product access and 24/7/365 availability
- Facility services, including garment management, gas cylinder management, PPE and safety management, and materials management (consumables recycling, waste, and hazardous waste)
- Chemical storage, handling, and lifecycle management services, including receiving, registering, and barcoding chemical containers through chemical tracking software (third party) for regulatory reporting purposes
- Bill of materials (BOM) management, including ordering, coordinating, and managing inventory; and campaign inventory management for indirect materials, including assurance of proper documentation (Certificates of Analysis, Certificates of Origin, etc.)

SureTRACE Program

The SureTRACE program provides assurance that a product adheres to strict quality and traceability guidelines. With SureTRACE products, you get quick and easy access to certificates, notifications of any changes impacting quality or supply, and a guarantee of minimal lots per delivery. Easily find SureTRACE products across fishersci.com with the  icon.

Learn more at fishersci.com/SureTRACE

SureTRACE+ Production Solutions

Upgrade to our SureTRACE+ Production Solutions program that builds on our SureTRACE offering to include dedicated program management and customer service, inventory planning, single-lot management, quality documentation, specialized palletization, warehouse capabilities, and more.

Encompass Procurement Services

Get the products you need with full-service, cost-effective third-party vendor aggregation, procurement, and supply chain solutions. By shopping through one source, you can eliminate the inefficiencies of submitting separate orders through multiple suppliers.

Sustainable Sourcing

Our products are sourced from suppliers that meet the highest standards of business ethics and integrity. We use the globally recognized EcoVadis platform to assess and help drive improvements in our suppliers' health and safety, labor, and sustainability performance, as well as monitor compliance with our Supplier Code of Conduct.
