

OHAUS® Products for all areas and applications in your

BOTANICALS WORKFLOW

From Start to Finish

Accurate measurement is critical throughout your entire production. You need results that you can trust—you can't afford any errors. OHAUS provides accurate, reliable, and affordable equipment to help grow your profits. See how OHAUS products have a place in every stage of your workflow.

CULTIVATION

Growing & Harvesting

Bulk Packaging

Pre-Packaging & Direct Sale

Cultivation sites are where cannabis plants are grown and harvested. Light, water, and nutrients are critical to maintaining healthy plants. Mature plants are harvested; stalks, leaves, and flower are measured, tracked, and packaged for resale or sent for further processing.

TESTING AND R&D

Analytical Sample Prep

Research, Development & Testing

Testing labs determine potency and test for cannabinoids, terpenes, solvents, pesticides, etc. Research labs explore the plant's medicinal properties and effects as well as develop new methods for growing, strains, products, and delivery methods.

PROCESSING

Production

Bulk Packaging

Pre-Packaging & Direct Sale

Processing facilities are where harvested cannabis plant materials are turned into other products for sale. Oils and terpenes are extracted and packaged for resale or used in other consumable products such as infused products or edibles.
